	<b>Total Amount</b>	<b>1,555,900</b>	<b>\$235,250</b>	<b>\$1,791,150</b>

Factor 5 – Achieving Results and Program Evaluation								
Regional planning issue to be addressed	Long-term outcome desired	Livability Principle(s) addressed	Applicable Activity in the Regional Plan for Sustainable Development	Anticipated Progress and Forms of Measurement	6 months	12 months	24 months	36 months
Update the Regional Policy Plan and local land use plans to more fully integrate the Livability Principles and address linkages between housing, transportation, equity, and the environment.	a. Creation of shared elements in regional transportation, housing, water, and air quality plans tied to local comprehensive land use.	Provide More Transportation Choices; Promote Equitable, Affordable Housing; Support Existing Communities; Coordinate Policies and Leverage Investment; Value Communities and Neighborhoods.	Updates to the Regional Policy Plan and local land use plans to create alignment with the Livability Principles. Development of a Regional TOD Plan with common goals, policies, and strategies to increase regional mobility and improve access to housing, jobs, and education.	Create an inventory of existing local and regional plans related to housing transportation, water, air quality, and land use. <b>Measure:</b> Publication of gap analysis report that analyzes sustainability gaps in existing plans.	Conduct visioning process with extensive public input to develop a regional Vision and Goals Statement that incorporates the Livability Principles. <b>Measure:</b> Regional consensus around major elements of sustainability and Statement of regional Vision and Goals.	Model a minimum of three regional investment scenarios to explore alternative growth patterns. Assess scenarios based on identified metrics and select a preferred scenario. <b>Measure:</b> Public input on scenarios incorporated into analysis and documentation.	Develop RPSP report outlining implementation strategies to achieve the preferred scenario and identify immediate and long-term policy changes. Link to local planning processes. <b>Measure:</b> Public support for adoption of RPSP.	
Limited access to jobs, transportation, and housing among low-income, minority communities and other disadvantaged populations living in mature neighborhoods.	b. Reduced social and economic disparities for the low-income and communities of color within the target region.	Support Existing Communities and Value Neighborhoods; Enhance Economic Competitiveness	Identify and implement local and regional policies and projects to improve access to jobs, housing, and transportation for identified communities.	Identify existing locations of low income and communities of color in the region, as well as data illustrating transportation access, employment centers, and housing types. <b>Measure:</b> GIS map and database that overlays transportation access, employment centers, and housing types with locations of low-income and communities of color.	Analysis of access to jobs, transportation, and housing for identified communities included in evaluation of future growth scenarios. <b>Measure:</b> Revisions made to evaluation scenario templates to include data for identified communities.	Access to jobs, housing, and transportation used as criteria for case study selection. <b>Measure:</b> Draft document outlining criteria for case study selection.	Access to jobs, housing, and transportation for identified communities highlighted in RPSP document adopted by the Consortium. <b>Measure:</b> Final RPSP includes policies and strategies designed to promote access to jobs, housing, and transportation for identified communities and neighborhoods.	
Development patterns have resulted in a region that is highly dependent on automobiles and designation as an ozone non-attainment area.	c. Decrease in per capita VMT and transportation-related emissions for the region.	Provide More Transportation Choices; Enhance Economic Competitiveness; Support Existing Communities	Develop three regional investment scenarios that explore interrelationships of development patterns and impacts on transportation and air quality.	Inventory available transportation and air quality data. <b>Measure:</b> Summary report and data analysis.	Identify updated metrics to measure transportation and air quality impacts of development patterns. <b>Measure:</b> Data library containing identified metrics and an inventory or acquired data.	Assessment of growth scenarios based on the updated metrics. <b>Measure:</b> Scenario results report and evaluation. Meeting summaries to inform public and stakeholders about impacts.	Selection of preferred scenario based on metrics analysis and extensive public input and feedback. <b>Measure:</b> Summaries of meetings and surveys.	
Approximately 70% of all households in southern Nevada spend more than 45% of total income on housing + transportation.	d. Decrease in combined housing and transportation costs per household.	Provide more Transportation Choices; Promote Affordable Housing; Coordinate Policies and Leverage Investment	Develop a toolbox of best practices and implementation strategies, adapted to our region, for individuals and communities to address the interrelationship of housing and transportation costs.	Conduct analysis of combined housing and transportation costs within the region. <b>Measure:</b> Summary report of data analysis	Identify linkages between housing and transportation costs and verify factors contributing to high housing + transportation costs for households in the region. <b>Measure:</b> Summary report of linkages and causes.	Conduct public outreach to educate identified communities on linkages between housing and transportation costs and gather input from residents. <b>Measure:</b> Create education materials, number of public outreach activities held, and public input received.	Draft toolbox of best practices and implementation strategies distributed to the RPSP Consortium for review. <b>Measure:</b> Draft toolbox approved by the Consortium.	

Regional planning issue to be addressed	Long-term outcome desired	Livability Principle(s) addressed	Applicable Activity in the Regional Plan for Sustainable Development	Anticipated Progress and Forms of Measurement	6 months	12 months	24 months	36 months
Need for long-range regional planning that incorporates stakeholder input from across a broad range of economic, social, and educational backgrounds.	e. Increased participation and decision-making in developing and implementing a long range vision for the region by populations traditionally marginalized in public planning processes.	Promote Equitable and Affordable Housing; Support Existing Communities; Value Communities and Neighborhoods	Create citizen participation plan that provides a forum for two-way communication throughout the process and specifies mechanisms for involving traditionally marginalized stakeholders. Citizen participation plan will include a series of leadership training and capacity building sessions for community leaders and organizations at locations throughout the region.	Identify a range of stakeholders and their challenges or opportunities for participation. Identify engagement strategies appropriate for different groups and schedule initial visioning and problem scoping events.  <b>Measure:</b> Matrix of stakeholder groups and appropriate engagement strategies, adopted by Consortium.	Host a regional summit and facilitate leadership training and capacity building sessions for community leaders and organizations, with specific sessions designed to reach populations traditionally marginalized in public planning processes.  <b>Measure:</b> Meeting summaries and a final report to describe meeting outcomes.	Conduct visioning and goal-setting sessions with residents identified stakeholders. Provide opportunities for input and feedback on community issues and goals as well as development of performance measures and scenario analysis tools.  <b>Measure:</b> Model development and stakeholder input meetings.	Identify priority implementation strategies through public meetings, forums, and on-line tools. Discuss alternative scenarios and potential to achieve sustainability metrics. Public review and comments on the draft RPSD document.  <b>Measure:</b> meeting summaries, synthesis report on scenario analysis and discussion about sustainability plan.	
Need for more convenient transit options, especially in outlying areas, for low-income residents who depend on transit for access to housing and jobs.	f. Increased proportion of low- and very-low income households within 30-minute transit commute of major employment centers.	Provide More Transportation Choices; Promote Equitable and Affordable Housing; Coordinate Policies and Leverage Investment; Enhance Economic Competitiveness	Identify barriers and challenges to providing more convenient transit options for all areas and create a prioritized list of strategies, programs, and demonstration projects designed to overcome those barriers and challenges.	Housing and Transportation Task Groups lead effort to collect data and spatially analyze existing affordable housing and job locations.  <b>Measure:</b> Meeting summaries, data inventory.	Develop metrics to measure jobs and affordable housing balance such as density levels, transit times, and housing costs compared to household income. Develop methodology for metrics analysis.  <b>Measure:</b> Analytical tool to evaluate development patterns.	Select demonstration projects to improve the jobs and affordable housing balance around major activity centers and historic downtowns.  <b>Measure:</b> Identify and support demonstration projects in various locations. Document and report results.	Assess scenarios based on developed metrics and identify strategies to address observed challenges to achieving preferred scenario for each demonstration area.  <b>Measure:</b> Analysis of scenarios and publication of project study reports.	
Lack of connectivity between neighborhoods and a preponderance of auto-oriented land uses limits mobility and access by pedestrians and cyclists and contributes to negative public health outcomes.	g. Improved public health outcomes that result from creating safer, more walkable neighborhoods.	Value Communities and Neighborhoods; Provide More Transportation Options;	Create a toolbox of best practices, adapted to our region, for conducting health impact assessments to maximize the positive health impacts and minimize the negative health impacts of proposed policies, programs, or projects.	Conduct research of best practices and strategies for using health impact assessments to measure and document the positive public health impacts of creating more walkable communities.  <b>Measure:</b> Summary report of research and case studies	Develop metrics to measure the positive public health impacts of creating more walkable communities. Develop methodology for metrics analysis.  <b>Measure:</b> Summary report identifying linkages and verifying impacts.	Select demonstration projects to assess the health impacts of creating more walkable neighborhoods.  <b>Measure:</b> Identify and support demonstration projects in various locations. Document and report results	Assess scenarios based on developed metrics and identify strategies to address observed challenges to achieving preferred scenario for each demonstration area.  <b>Measure:</b> Analysis of scenarios and publication of project study reports.
