**Subject: City of Henderson Trail System Design**

To the Development Community:

Within the city of Henderson, trail corridors have been identified and master-planned for future development. Trail development is done either through the City of Henderson or by a developer.

Parcels that are adjacent to an identified trail corridor are conditioned to provide trail improvements for the applicant's property frontage. In some instances trail improvements have been constructed. When this is the case, the applicant will be conditioned to provide enhancements to the trail based on the master plan design. Enhancements could include, but are not limited to, additional landscape/irrigation, rock, signage, trail amenities, lighting, or art.

If you have any questions or need additional information, please contact me at 702-267-4023 during our business hours, Monday-Thursday, 7:30 a.m.-5:30 p.m.

Sincerely,

Amie D. Wojtech  
Park Project Manager
