

# OUTDOOR CHALK PAINT

## Supplies needed:

- 1 cup cornstarch
- 1 cup water
- Food coloring, miscellaneous colors
- 4 small plastic cups
- Paint brushes

## Directions:

In a mixing bowl, combine the water and cornstarch and stir until the cornstarch dissolves and it is smooth. It will be kind of runny so, don't worry about that.

Divide the mixture evenly into the small plastic cups. Use the food coloring to make a different color paint in each cup. You can even mix the food coloring to come up with your own custom colors.

Then, use paint brushes to paint pictures on the sidewalk or driveway outside. The mixture is thinner and runnier than regular paint, but just paint your pictures like you would with any other paint. The paint dries quickly, and it will resemble sidewalk chalk. It washes off very easily with rain or the hose.
